

VERIZON WIRELESS: TAKING A RAZR TO THE MIDDLE CLASS

Despite billions in profits and hundreds of millions paid out in executive compensation, Verizon Wireless is attacking middle-class jobs.

The company forced workers to pay thousands of dollars more for health care and slashed the level of benefits. **Verizon Wireless workers face staggering health care costs and no income security when they retire.**

When non-union Verizon Wireless call center workers tried to win decent, middle-class jobs by organizing a union, management responded with harassment and intimidation. They even **closed down entire call centers in New York and New Jersey to stop the workers from joining the union.**

Now, Verizon CEO Lowell McAdams and other top executives—who made hundreds of millions of dollars in recent years—**refuse to bargain a fair contract with unionized Verizon Wireless workers.**

Verizon Wireless workers are the 99%. All they want is a decent middle class life, not to be forced into another strike to defend their rights.

DON'T BUY THE DROID RAZR OR OTHER PHONES AND SERVICES SOLD BY VERIZON WIRELESS UNTIL THEY NEGOTIATE A FAIR CONTRACT.
